# O P T I M U M

The Optimum 4000 represents the new standard in air treatment technology. Versatile, safe, and effective, this quiet compact electric unit improves indoor air quality using Vaportek's patented non-toxic membrane. The infinitely adjustable output control and simple cartridge replacement system makes the Optimum 4000 the choice for air quality professionals.

# O P T I M U M

The new Optimum 4000 solves difficult indoor air quality challenges and can effectively treat open spaces up to 20,000 cubic feet, a room 45' x 45' x 10'.

The electronically-controlled Optimum 4000 features a quiet fan that moves air through the unique Vaportek cartridge. A convenient control switch allows you to precisely control output with 10 settings. A green neon indicator light shows when the unit is operating.

Odors are neutralized by the patented Vaportek system, which features a "breathing" membrane containing an exclusive mixture of non-toxic essential oils. Deodorizer vapor is released as airflow passes over the membrane sealed inside the replaceable cartridge.

The Optimum 4000 neutralizes malodors instead of masking them with an overpowering fragrance. The standard output cartridge for example is easily replaced and will remain effective for up to 3 months.

The non-toxic Optimum replacement cartridge is sealed for easy use, eliminating problems associated with gels, liquids and pressurized sprays.

Proven safe and effective for over 15 years in medical facilities around the world, the Vaportek Optimum series is the convenient choice for treatment of any odor problem. A security wall bracket and lock are available for permanent installation.

## Selected Specifications:

- Patented Technology
- Attractive Off-White Finish
- Replacement Cartridges are Available in Three Output Strengths and a Variety of Odor Neutralizing Aromas.
- Optional White Steel Mounting Bracket with Lock
- Compact Portable Design
- UL and CSA Listed
- Ergonomically Designed Cartridge Grip Surfaces
- Thermally Protected Motor
- 2 Year Limited Warranty
- Quiet Operation
